Profile

User-centered design and development is my forte. Ensuring the needs of the user are transformed into working solutions. I love to challenge myself every day, learn new technologies, and to see a project grow from an idea to a problem-solving product or feature. Literal chills!

Projects

VDial ecommerce ⬈

Tech Stack: **NextJS, Sanity, Tailwind CSS**
A React JS app for a huawei reseller. Managed cart state using React context API and styling using Tailwind CSS.
Also worked with Sanity CMS to manage product inventory.

Golds Gym, A home alternative to your local gym ⬈

Tech Stack: **Reactjs, Material UI**
- A React application harnessing the ExerciseDB API.
- Ability to search for exercises by name, equipment, and body parts.
- Shows youtube videos of related exercises.
- GIF images showing instances of the exercise.

Languages & Tools

- Git
